Another change that took place is that the Eagle International factory came on line very late in 1974. This would split Eagle production for 1975 and 1976. At the start of 1977 there were no more Bus & Car Eagles built for US operators.

At this point the silversiding changed. Until this bus, all Eagles had a lightning bolt or 'Z-bar' on each side plus a raised metal Eagle emblem. From here the silversiding was all the same height and the Eagle emblem became a decal. The raised metal lettering with the operator's name also went away. The window frames were changed from silver to black and on all Continental buses the base color became white like all other Trailways operators used rather than cream/beige/pale yellow.
